

New!

The Persona CardJet C7 Desktop Card Printer

Simply dependable.

Simply affordable.

Simply *Persona*.

Print high-quality plastic cards with no trouble or training. It's inkjet-easy!

The Persona® CardJet C7 brings the simplicity and affordability of inkjet printing to personalized plastic cards. Featuring FARGO's exclusive CardJet Printing Technology™, this new Persona prints on plastic cards via highly specialized thermal inkjet technology. Just drop in the pre-loaded 50-card cartridge, snap in the ink cartridges and print! It's inkjet-easy!

Dependable and virtually maintenance-free operation

Featuring a reliable Hewlett-Packard inkjet-based print engine, the CardJet C7 requires virtually no maintenance and can print one or hundreds of cards per day with consistently great-looking results. An ink-level gauge in the printer driver and helpful on-screen messages eliminate the surprise of empty ink and card cartridges.

Fast, affordable color

Why mess with labor-intensive cut-and-paste systems? The CardJet C7 delivers full color, over-the-edge printing on a single-sided card in as fast as 22 seconds. At 600 dpi, your images look razor-sharp. And because CardJet ink bonds and dries instantly to CardJet cards, there's no smearing or mess.

On-demand personalization that lasts

A great choice for common applications, the intuitive CardJet C7 requires little or no user training. Plus, specially formulated CardJet cards stand up to abrasion, dye-migration and UV fading better than traditional cards.

Let a Persona desktop card printer meet your needs and budget!

Persona CardJet C7 Specifications Overview

Print Speed

- 22 seconds per card (Fast Print Quality)
- 40 seconds per card (Normal Print Quality)
- 67 seconds per card (Best Print Quality)

Warranty:	Printer – One year
FARGO Certified Supplies:	FARGO Card Printers require highly specialized media to function properly. To maximize printed card quality and durability, printhead life and printer reliability, use only FARGO Certified Supplies. FARGO warranties are void, where not prohibited by law, when non-FARGO Certified Supplies are used.

* Print speed will vary depending on the amount of color coverage within a card design. The above print speeds represent a full-color, full-bleed design; designs with less color coverage will print faster. Print speed indicates an approximate batch print speed and is measured from the time a card feeds into the printer to the time it ejects from the printer. Print speeds do not include encoding time or the time needed for the PC to process the image. Process time is dependent on the size of the file, the CPU, amount of RAM and the amount of available resources at the time of the print.
