

DATACARD® CERTIFIED SUPPLIES

Guaranteed performance from your Datacard equipment

Datacard offers a full menu of supplies specifically calibrated for Select Class card printers—including our new, enhanced print ribbons that support Advanced Imaging Technology™.

Advanced Imaging Technology™.
Our optimized print ribbons improve image sharpness and color quality on cards personalized at high speeds.

Inline topcoats. Datacard topcoats protect photos and printed data from chemicals and abrasion.

Optimized for use in Select™ Class Printers.

You chose a Datacard® Select™ Class card printer because you insist on issuing the highest-quality cards to your cardholders—and getting the greatest possible productivity and uptime from your card program. To ensure your Datacard printer operates at its potential for speed, reliability and image quality, we recommend using only Datacard Certified Supplies.

Our print ribbons, topcoats, cleaning supplies, printheads and other supplies—only available through your Authorized Datacard business partner—are system-matched and specifically designed for your Select Class printer. So, you can count on smooth, error-free printing and exceptional uptime.

Certified print ribbons maximize image quality at high speeds.

Premium Datacard® print ribbons produce crisp, true-to-life photos on cards, as well as bar codes, logos, text, signatures and more.

Our new, enhanced ribbon series provides better image quality at faster speeds—an innovation we call Advanced Imaging Technology™. This technology dramatically improves the quality and sharpness of photos, graphics and logos on full-color and one-color cards. Premium Datacard print ribbons with blue cores offer superior results with Advanced Imaging Technology.

Choose one-color, three-color or four-color ribbons for printing on one or both sides of a card. Our three-color ribbons are ideal for applications that require crisp, full-color imaging.

Inline topcoats extend card life.

In addition to our standard print ribbons, all three- and four-color print ribbons provide inline application of clear topcoats. Topcoats protect cards against chemical attack, abrasion and ultraviolet radiation. These topcoat ribbons are also enhanced to support Advanced Imaging Technology.

Cleaning rollers protect your investments.

Extend printhead life and improve printer performance with our continuous cleaning rollers. These convenient rollers automatically clean your printer without having to open the cover. On-screen prompts tell you when to change the cleaning roller and insert a cleaning card into the printer. These prompts are adjustable to appear from every 1 to 1000 cards produced—or not appear at all.

Operator-replaceable printhead saves time and money.

An operator-replaceable printhead minimizes equipment downtime and the high costs associated with on-site service. Our printhead simply snaps into place—with no tools or calibration required. Even first-time operators can install a new one in seconds. Our ribbons, cleaning rollers and card cartridges are also designed for simple, one-step operator installation.
