

## DATAVS1 SERIES

The **DATAVS1** series is the easiest solution for machine vision applications. The setup is very quick and intuitive thanks to the VSC unit, the external configurator with 3.5" colour display. The sensor setting is carried-out through three simple steps: region of interest definition, control type selection, parameter adjusting. **DATAVS1** is a fully embedded vision sensor able to acquire images, control them and activate digital outputs according to the result. The VSC unit can provide a real time monitoring of the images, but it is not required during the functioning of the sensor and so it can be disconnected and used to setup multiple sensors. **DATAVS1** is able to carry-out 8 different controls: Brightness, Contrast, Position, Width, Edge counting, Pattern match, Pattern match counting, OCV. Its flexibility together with the VSC configurator make the sensor ideal for plants with frequent format changes (packaging, food, cosmetic, bottling, labelling,...).

VISION

## HIGHLIGHTS

- Quick setup without PC
- Fully embedded vision sensor
- 3.5" colour display, 8 push-buttons, 8 LEDs
- 8 different controls
- Memorisation of 20 different inspections

## APPLICATIONS

**DATAVS1** is ideal for the control of text presence in overprinting and logo position on food packages, product completeness before packaging, logo position on cosmetic bottles, correct stamp on post envelopes, liquid level inside a plastic bottle, correct product orientation on a conveyor belt, expiry date or lot number integrity.

Surface control

Part orientation

Expiring date integrity

Level control

Product conformity

Bottling check

The extremely compact size of the DATAVS1 sensors is not an obstacle for the full integration of all the elements for a reliable image-based control.

- Compact housing
- 640 x 480 image sensor
- VSC configurator with 3.5" colour display, 8 push-buttons, 8 LEDs
- Red light LED illuminator
- Selectable lenses
- Standard M12 connectors
- Configurator preset for DIN rail or panel mounting
- 3 PNP outputs
- 4 signalling LEDs: output1, output2, power supply, communication

## DIMENSIONS

## INDICATORS AND SETTINGS

- A** Power supply, green
- B** Digital output 2, yellow
- C** Digital output 1, yellow
- D** VSC connection, green

- A** Setting mode, green
- B** Adjust mode, green
- C** Monitor mode, green
- D** Main menu, green
- E** Power supply, green
- F** Digital output 1, yellow
- G** Digital output 2, yellow
- H** Sensor connection, green

## CONNECTIONS

ETHERNET

### M12 8-pole (VSC connection)

- PIN 1 = Ethernet TX+
- PIN 2 = Ethernet RX+
- PIN 3 = Ethernet RX-
- PIN 4 = Not used
- PIN 5 = 24 Vdc
- PIN 6 = Not used
- PIN 7 = Ethernet TX-
- PIN 8 = GND

### M12 8-pole (power supply and I/O)

- PIN 1 = white = digital input 1
- PIN 2 = brown = 24 Vdc
- PIN 3 = green = STROBE for external illuminator
- PIN 4 = yellow = output 1
- PIN 5 = grey = output 2
- PIN 6 = pink = output 3
- PIN 7 = blue = GND
- PIN 8 = red = external trigger

## TECHNICAL DATA

Power supply:	24 Vcc ±10 %
Ripple:	1 Vpp max with illuminator 2 Vpp without illuminator
Consumption (DATAVS1+VSC):	300 mA @ 24 Vdc (illuminator excluded)
Output type:	3 PNP
Output current:	100 mA max
Saturation voltage:	< 2 V
VSC connection:	M12 8-pole A-code
External illuminator interface:	Strobe signal (24 V PNP N.O.)
Frame rate:	60 fps
Optics:	integrated (6 mm / 8 mm / 12 mm / 16 mm)
Setting:	VSC configurator
Sensor indicators:	4 LEDs
VSC indicators:	8 LEDs
Connections:	2 x M12 8-pole A-code
Mechanical protection:	IP50 (DATAVS1) IP40 (VSC)
Protection devices:	A, B <sup>2</sup>
Housing material:	aluminium alloy / ABS
Sensor weight:	125 g
VSC weight:	170 g
Operating temperature:	-10 ... +50°C
Storage temperature:	-25 ... +70°C

## TECHNICAL NOTES

<sup>1</sup>Limit values

<sup>2</sup>A - reverse polarity protection

B - overload and short-circuit protection

## FIELD OF VIEW

OPERATING DISTANCE (mm)	FIELD OF VIEW (Width x Height) in mm			
	DATAVS1-16-C-S	DATAVS1-12-DC-S	DATAVS1-08-DC-X	DATAVS1-06-DC-S
50	-	17 x 12	25 x 20	42 x 30
80	-	25 x 20	40 x 30	60 x 41
110	-	33 x 25	55 x 40	80 x 55
140	31 x 24	45 x 35	70 x 50	98 x 69
170	39 x 29	53 x 38	85 x 60	118 x 83
200	46 x 34	60 x 50	100 x 70	138 x 92
300	70 x 53	90 x 65	145 x 103	201 x 140
400	94 x 71	121 x 82	186 x 132	265 x 189
500	118 x 89	150 x 110	236 x 167	330 x 232
600	143 x 107	185 x 130	282 x 232	385 x 270

## DATAVS1 CONFIGURATOR

The configuration of DATAVS1 sensors is obtained exclusively via VSC unit. No PC is necessary and thus sensor setting is easy and quick. Once the configuration has been completed, the VSC display can be used to visualise inspection results in real time or to configure a new sensor.

The interface available on the configurator, composed of 8 signalling LEDs and 8 push-buttons, allows the operator to quickly and intuitively set the sensor functioning parameters.

### PUSH-BUTTONS

Push-button label	Main functions
Status	Go to next configuration step
Teach	Setting memorisation Acquisition of a new reference image
Set	Confirmation of option selected Confirmation of parameter value
Esc	Exit without saving Return to previous panel Return to previous configuration step
Arrows	Change of option selected Movement/resizing of ROI Parameter change

### Step 1: Image adjustment and control definition

In the first configuration step, the user has to set the sensor parameters in order to obtain a good image quality in terms of focus, brightness and contrast. The control type and the part to inspect have to be then defined.

### Step 2: Parameter setting

The second configuration step consists in setting the functioning parameters of the control previously selected and the acceptance thresholds.

### Step 3: Inspection check and memorisation

The third step consists in the control of the correct inspection functioning and the saving on the sensor memory. Once completed, the sensor can operate in a stand-alone mode.

## EXCELLENT FLEXIBILITY

### Password

A Password that prevents the access to the configuration parameters to unauthorised personnel can be defined.

### Fail inspector

The latest 8 inspected parts that have caused a control failure can be recalled by the Fail Inspector. This tool provides an immediate control of the production non-conformities.

### Inspection selection

Each inspection is composed of a template and parameters. A specific inspection can be thus referred to different products in progress on the same production line. The different inspections can be recalled using digital pulses. Different inspection selection protocols with or without acknowledge are available.

The inspection change can be carried-out also directly by the operator using the bankset manager panel.

## MONITORING USE OF THE VSC

### Standard mode

### Camera mode

### Zoom mode

### Fail mode

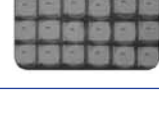

### Production statistics

Besides the four monitoring modes, indicated above, the VSC configurator can visualise some production statistics, such as the number of inspected items and percentage of non-conformities.

## Object Recognition

Eight different controls able to cover the most varied applications.

Control	Functioning	Applications	Image
Pattern Match	Searches a sample inside a specific area	<ul style="list-style-type: none"> <li>• Packaging: logo check</li> <li>• Assembling: product orientation</li> <li>• Post automation: stamp check</li> </ul>	
OCV	Verifies the readability of printed characters	<ul style="list-style-type: none"> <li>• Packaging: production lot control</li> <li>• Food: expiry date control</li> </ul>	
Position	Checking of object border position	<ul style="list-style-type: none"> <li>• Bottling: liquid level control:</li> <li>• Food: label position control</li> </ul>	
Width	Measures object width	<ul style="list-style-type: none"> <li>• Assembling: plastic part control</li> <li>• Wood industry: branch thickness measurement</li> </ul>	
Counting	Counts the objects along a line	<ul style="list-style-type: none"> <li>• Electronics: component counting</li> <li>• Pharmaceutical: blister stack counting</li> </ul>	
Contrast	Contrast calculation	<ul style="list-style-type: none"> <li>• Food: date and lot presence control</li> <li>• Metal working: laser marking control</li> </ul>	
Brightness	Brightness calculation	<ul style="list-style-type: none"> <li>• Bottling: cap presence control</li> <li>• Packaging: object counting</li> </ul>	
Pattern match count	Count the number of templates inside a specific area	<ul style="list-style-type: none"> <li>• Bottling: bottle count</li> <li>• Packaging: object counting</li> </ul>	

## ACCESSORIES

**ST-5066**  
U-shaped fixing bracket for angle adjustment

**ST-5068**  
L-shaped fixing bracket for 90° mounting

Mounting kit
