

MS-4

Ultra-Compact Imager

The MS-4 imager is designed specifically for embedded bar code applications. Currently the world's smallest high resolution imager, the MS-4's ultra-compact size and wide angle optics provide the widest field of view available for reading any symbol at close range.

It is the ideal imager for OEM design engineers who need to read 2D symbols in tight spaces with 100% data integrity.

MS-4: Available Codes

Compact & Lightweight

The MS-4 is the world's smallest high performance imager. Its small form allows flexible positioning in tight spaces. The lightweight and durable magnesium alloy case weighs less than 2 oz.

Mounting Flexibility

The MS-4's compact size, right angle mirror option, and corner-exit cable conserve cubic space to create the tightest fit possible within instrumentation and equipment.

Wide Field of View

The MS-4 has an extremely wide field of view and reads linear codes or 2D symbols as close as 1" (25 mm).

Real-time Controls

The inputs include a trigger signal, a "new master" input, and a programmable input for resetting counters or releasing outputs. The outputs can be configured to activate upon a variety of conditions including matchcode and diagnostic operations.

Omnidirectional Reading

Linear codes or 2D symbols can be decoded in any orientation. The MS-4 removes the restriction of planning for laser line alignment.

Application Examples

- Clinical instruments
- Bank ATMs
- Parking kiosks
- Point-of-sale terminals
- Robotics

Read Range and other performance data is determined using high quality Grade A symbols per ISO/IEC 15415 and ISO/IEC 15416 in a 25° C environment. For application-specific Read Range results, testing should be performed with symbols used in the actual application. Microscan Applications Engineering is available to assist with evaluations. Results may vary depending on symbol quality. **Warranty**—One year limited warranty on parts and labor. Free extended 3 year warranty upon online product registration.
