PD1200, PD1100 and PD220 Customer Displays

Ultimate Technology customer displays set the industry standard because they're the ideal fit for virtually every POS application. The PD220, PD1100 and PD1200 all include selectable baud rates, 360° pole rotation, 20° tilt and text flashing, and are assembled in the U.S. from quality components. Which means your inital investment will result in years of highly efficient, uninterrupted service at the point-of-service.

PD220

Thousands of PD220 customer displays are performing right now at retail locations across the country. Its popularity in diverse POS applications is due to the PD220's proven performance and indispensable features such as a 2x20 VFD, standard serial or parallel interfaces, four programmable display intensities, and vertical scrolling capablilities.

PD1100

The PD1100 can be even more finely adjusted to fit your specific retail application. Along with the features common to all of our customer displays, the PD1100 expands your options with serial, parallel and pass-through interfaces, four programmable display intensities, menu-driven selectable parameters via external switches, and large 10.5 mm by 5.5 mm character size.

PD1200

The latest customer display from Ultimate Technology, the sleek PD1200, is designed for maximum value and appeal at the point-of-service. Beyond its terrific looks, the PD1200 is fully programmable, robust and brightly illuminated. Its clear 2x20 VFD and large character sizes provide easy-to-read messaging, and its 224 displayable characters give you the versatility needed in your retail environment.
